

ASSET

**MANAGE THE OPERATION
OF YOUR INDUSTRIAL ASSETS
AND IMPROVE YOUR
OPERATIONAL EFFICIENCY**

YOUR **EQUIPMENT** AT THE HEART OF OUR **DEVELOPMENT**.

2 SOLUTIONS FOR GLOBAL ASSET MANAGEMENT

1

SIRFULL™ Maintenance allows you to manage and optimize your global maintenance strategy according to your business standards, your technical data and the regulatory standards of your equipment.

➔ Move from corrective or preventive maintenance to a more advanced and optimized approach that considers the actual state of each asset family and schedules the maintenance tasks to be performed.

4 LEVELS OF FUNCTIONALITY:

- Technical data importation and structuration
- Analyse of the impact for the selected maintenance strategy
- Automatic edition and update of maintenance and inspection plans
- Global integration and implementation of group standards

4 BENEFITS:

- Ensure the respect for group recommendations and maintenance operation frequencies
- Reduction of reengineering costs
- Improving equipment reliability
- Major time saving in the edition/update of Maintenance Plans

2

SIRFULL™ Inspection allows you to develop and manage your inspection strategies, from planning operations to finalizing the various actions.

➔ Go towards a most harmonized approach to inspection, enabling effective traceability and visualization of your equipment operational data.

4 LEVELS OF FUNCTIONALITY:

- Complete documentation management
- Failure modes and Non Destructive Testing (NDT) management
- Multi-country regulatory engine (Risk Based Inspection)
- Mobile application in offline mode

4 BENEFITS :

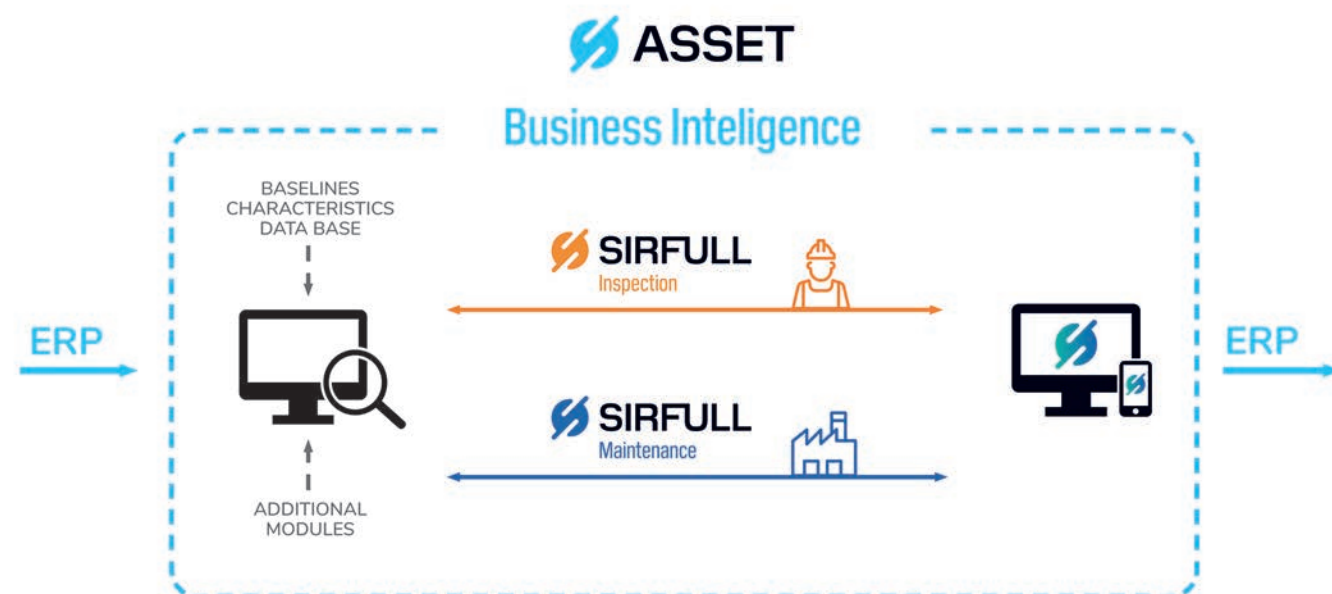

- Compliance with mandatory regulatory inspections
- Reduction of inspection costs
- Improved equipment availability
- Major time saving in inspection actions

PRESENTATION

SIRFULL™ Asset is a complete range of solutions that form part of a global approach to the lifecycle of equipment, from the design phase to its operation and dismantling.

Considering regulatory guidelines and your integrated data repositories, our solutions optimize the technical and economic performance of all your industrial sites, accelerate the return on investment of equipment and facilitate the management of your assets.

LES BÉNÉFICES

BUSINESS SUPPORT AND TECHNOLOGICAL FROM A TO Z

SIRFULL has a rich experience in equipment manufacturing, industrial inspection and maintenance as well as in state-of-the-art technologies.

Our teams are in charge of a portfolio of customers around the world and are on-hand to help you throughout all the steps of your project: launching, analysing, developing, tailoring, rolling out, training, supporting and servicing.

The SIRFULL platform is accessible in SaaS mode for «turnkey» use:

- 1** Interfaced with your third-party applications (ERP, CMMS, BIM, BI,...)
- 2** Available with a mobile application in offline mode, to complete your plans, field reports, photos,... and share your feedback and conclusions without data re-entering or loss

ABOUT US

SIRFULL is a software vendor with a strong industrial culture and French know-how, developing solutions that enable its customers to anticipate changes in their market:

- We capitalize on information and value data, to share and enrich the experience of peoples;
- We optimize and manage the life cycles of industrial equipment;
- We facilitate exchanges with the various stakeholders of our customers to make their ecosystem more collaborative.
